

DATA FIX: Document Numbers with C5X

You will see a large number of transactions on the DAFR2151 Error Report and also your 530 View Batch Headers Screen with document numbers beginning with C5X. These are related to a data correction. Please do not attempt to do anything with these transactions as they will be corrected centrally by MAIN. These transactions are to correct unliquidated encumbrance discrepancies between ADPICS and R*STARS. We will notify you when these transactions have been successfully corrected.
